First, Do No Harm

TESLA RANGE

OUT & ABOUT

TESLA Portable

Half the strength of the Premium Portable and lightweight also for children, the white Portable has a three-metre radius (six metre diameter) area in all directions. Place in your pocket or bag when out & about when away from your protected zone, or when travelling.

D 80mm x 50mm x 8mm, W 45g.

HOME & WORKPLACE

TESLA Cube

The Cube with 4 international plugs has a 90 metre radius in all directions (180 metre diameter) and is twice the strength of the Plug-in. The Cube is recommended for homes with medium to high EMF, homes within line-of-sight of a mobile phone antenna tower, homes with smart meters, solar panels, high-rise apartments and schools. As the strength of the device is more significant than the radius covered, the Cube as a minimum is recommended for most homes in Australia.

D 115mm x 100mm x 100mm, W 250g.

TESLA Ultra

The Ultra comes with 4 different international plug types, has a 90 metre radius in all directions (180 metre diameter), and is twice the strength of the Cube for ultra high EMF environments. Recommended for some homes, homes in close proximity to a mobile phone tower or a smart meter grid and workplaces.

D 140mm x 100mm x 40mm, W 390g.

SOME HOMES

TESLA Plug-in

The Plug-in model comes with 4 different international plug types and has a 45 metre radius area in all directions (90 metre diameter). This model is recommended for homes with low EMF, for those very sick, the elderly, and for some EHS sufferers to commence on.

D 90mm x 35mm x 45mm, W 75g.

PREMIUM RANGE

OUT & ABOUT

Premium Portable

This new Portable is twice the strength of the white Portable. With a five metre radius (10 metre diameter) area in all directions, place in your pocket or bag when out & about when away from your protected zone or when travelling.

D 100mm x 60mm x 10mm, W 100g.

HOME & WORKPLACE

Premium Cube

The Cube with 4 international plugs has a 90 metre radius in all directions (180 metre diameter) and is twice the strength of the Plug-in. The Cube is recommended for homes with medium to high EMF, homes within line-of-sight of a mobile phone antenna tower, homes with smart meters, solar panels, high-rise apartments and schools. Further enhanced with Blushield's proprietary technology.

D 115mm x 100mm x 100mm, W 650g.

Premium Ultra

The Premium Ultra comes with 4 different international plug types, has a 90 metre radius in all directions (180 metre diameter), is the same strength as the Ultra and is recommended for many homes, workplaces and hospitals. Further enhanced with Blushield's proprietary technology.

D 140mm x 100mm x 40mm, W 390g.

IN YOUR CAR

TESLA Auto

This Auto model with a 15 metre radius in all directions (30 metre diameter) is half the strength of the Cube. The Auto is recommended for all vehicles, especially while using mobile phones and other wireless technologies when travelling. Travelling in a car with a mobile device can amplify the EMF up to three times stronger than in free space.

D 80mm x 80mm x 35mm, W 125g.
