

Quick Start Guide

EVO PYRAMID

www.blushield.global

The EVO Pyramid is an enhanced and optimised completely new design of EMF protection which can offer further benefits for enhanced wellbeing.

Installation:

Select your country plug-in and press the black button down to change to your appropriate plug. Plug in the power supply and GENTLY push the socket plug end into the socket on the EVO Pyramid. Make sure not to force the plug as this may damage the socket. Damaged sockets from wrongful use or excessive force used or dropping are not covered under the warranty.

Once the power plug is inserted you will observe the LED indicator light up. The device will display a subtly lit orange indicator light which will follow a distinctive pattern.

- Remains solidly lit for 30 seconds
- Turns off for approximately 5 seconds
- Continuously repeats this cycle

If you fail to see a faint orange light at the plug in point, ensure the power supply is turned on at the wall.

Ensure not to force the plug into the socket.

Only use the included power supply as other third-party power supplies may be the wrong voltage or polarity, potentially damaging the EVO Pyramid. Using incorrect power supplies will void the warranty. If a new cord is needed, contact your distributor to purchase a genuine Blushield power pack.

Preferably locate the EVO Pyramid in a central area within your home and office. Place on a flat smooth and stable surface. If the EVO Pyramid is dislodged from its location and falls, place on a flat stable surface to remain stable.

Place one EVO Pyramid per level in an apartment.

One EVO Pyramid per house or office should be sufficient.

Each EVO Pyramid will have a spherical coverage of up to 300m diameter.

The EVO Pyramid DOES NOT:

- Interfere with wireless devices
- Block any mobile phone or Wi-Fi signals
- Interfere with pacemaker use
- Cause electronic devices to stop working

The EVO Pyramid is made of aircraft-grade alloy with gold electroplating and is strictly for interior use only.

Specifications:

- Distance covered – up to 150m Radius in all directions
- Weight – 1200gms
- Size – 200mm x 200mm x 120mm
- Power Source 12 Watts
- 120-240 voltage range.
- The product is shipped with a converter plug for AU/US/EU/UK.

WARRANTY:

All Blushield Products carry a manufacturer's warranty for a period of one year. This covers factory defects or faults only. The warranty does not cover misuse, modification, neglect, water damage, or opening of the case. The warranty does not cover wear and tear on the power plug cord or damage to the power cord.

CAUTION
